DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 9-20 are rejected under the judicially created doctrine of double patenting over claims 1-5 of U. S. Patent No. 6,685,499 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: terminals, a terminal holding member, a cover and a pull tab.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (6,089,924).

Wang, figure 1, discloses a connector comprising terminals (51 and 52), a terminal holding member (10) that is made of an insulating material and holds the terminals, and a cable (30) that is electrically connected to the terminals and extends out from the terminal holding member. The connector further having a pull tab (60) made from a flexible sheet that having a tip end part (61) thereof bonded onto the terminal holding member and extends outwards. Wherein the connector is removed from a counterpart connector into which the connector has been fitted by pulling the pull tab.

Regarding claim 10, the pull tab is formed from a conductive material so as to provide a magnetic shield.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang (6,089,924).

Regarding claim 13, Wang discloses the instant claimed invention as described in claim 9 above and a protective cover (20) except for the protective cover made of a conductive material.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Wang to have the protective cover made of a conductive material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as well known in the art. In re Leshin, 125 USPQ 416, in order to conduct an electricity.

Regarding claim 14, Wang discloses the instant claimed invention as described above except for the pull tab is formed from insulating housing material.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Wang to have the pull tab is formed from insulating housing material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as well

known in the art. In re Leshin, 125 USPQ 416, in order to protect the user from an electricity.

Allowable Subject Matter

7. Claims 17-20 are allowed.

8. Claims 11-12 and 15-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is an examiner's statement of reasons for allowance:

None of the reference discloses the pull tab is bonded using an adhesive onto an outside face of the terminal holding member/protective cover, in combination with the other claimed elements of the embodiments recited.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
